

**Donnerstag, 08.02.2024, 14.00 Uhr**

## **Leipziger Meteorologisches Kolloquium**

**Prof. Dr.-Ing. Jens Schneider**

***(HTWK Leipzig, Fakultät Ingenieurwissenschaften)***

### ***“How to Energiewende”***

Rooted in the topic "Networked Energy Systems", Prof. Jens Schneider researches and teaches climate-friendly energy supply at the HTWK in Leipzig. Together with students, he wants to develop new solutions for the successful networking of energy systems in order to make the industry fit for a climate-friendly future.

Today, he will talk about the following:

Without fossil fuels we need an entirely new energy system - renewable energies, sector coupling and flexibility. How far have we come, what's still to be done, which obstacles lie ahead? Feel free to ask all questions.
